

CLEAN VERSION OF AMENDED CLAIMS OZ 50091

-
3. A process as claimed in claim 1 wherein the moist crude granulate is spheronized before carrying out the polymer coating.
4. A process as claimed in claim 1 wherein the granulation and/or polymer coating is carried out continuously or batchwise.
- A¹ 5. A process as claimed in claim 1 wherein the crude granulate has a narrow particle size distribution.
6. A process as claimed in claim 1 wherein the crude granulate is coated with an aqueous or nonaqueous solution or dispersion of the organic polymer.
-
9. A process as claimed in claim 1 wherein a powder coating is carried out with a powder of a solid polymer which is selected from the group consisting of hydroxypropyl methyl celluloses having a number average molecular weight from 6000 to 80,000; mixed with a plasticizer.
10. A process as claimed in claim 1, wherein a melt of at least one polymer is used for the coating, which polymer is selected from the group consisting of:
- A² a) polyalkylene glycols, in particular polyethylene glycols, having a number average molecular weight from 1000 to 15,000;
- b) polyalkylene oxide polymers or copolymers having a number average molecular weight from 4000 to 20,000, in particular block copolymers of polyoxyethylene and polyoxypropylene.
-
13. The use as claimed in claim 11 wherein it comprises at least one enzyme which is selected from the group consisting of oxidoreductases, transferases, lyases,
- A³

CLEAN VERSION OF AMENDED CLAIMS OZ 50091

A3 isomerases, ligases, phosphatases and hydrolases.

- A4 17. A pelleted feedstuff composition which, in addition to customary constituents, comprises at least one feed additive as claimed in claim 11 as admixture.
